28<sup>th</sup> September 2015, Paris (France):

NYCO announces today that we recently signed a contract with Jet Time for the use of Turbonycoil 600, a synthetic standard turbine oil, for use in their fleet of ATR and B737 aircraft powered by Pratt & Whitney Canada PW100 and CFM International CFM56 respectively.

*“We are proud to count Jet Time as our first Danish customer to use our standard turbine oil for civil aviation.”* said Andre Chater, Sales & Marketing Manager EMEA for NYCO. *“Already well represented in the military market in Northern Europe, we are keen that this agreement will open the door to new customers in civil aviation in this region.”*

Turbonycoil 600 is a standard lubricating oil with a viscosity of 5 cSt at 100°C based on high thermal stable polyol esters, and fortified with carefully selected anti-oxidant, antiwear and anti-corrosion additives.

Approved against demanding specifications, including SAE AS5780 SPC Class and MIL-PRF-23699 F STD Class, Turbonycoil 600 is approved by all major engine manufacturers (General Electric, Pratt & Whitney, Pratt & Whitney Canada, Rolls-Royce, Snecma, Turbomeca, CFMI, Klimov, Motor Sich, Aviadvigatel).

### **About NYCO:**

NYCO is a worldwide-recognized manufacturer of synthetic esters and specialty lubricants for Aeronautics, Defence and Industry. Our solutions include:

- Civil aviation lubricants

**NYCO**  
AERONAUTICS

## PRESS RELEASE

- Military lubricants compliant with international specifications
- Ground gas turbines lubricants
- Synthetic ester base stocks for lubricants, plasticizers, dielectric fluids
- Synthetic lubricants for industrial and automotive applications
- NYCOGREEN: environmentally-considerate and biodegradable esters and lubricants
