

## Air France Industries KLM Engineering & Maintenance selects NYCO's Nyco Grease GN 148 for the Air France fleet of Boeing and Airbus

*Nyco Grease GN 148, multipurpose grease for all commercial aircraft - NYCO 2015*

20 October 2015, Paris (France):

NYCO is pleased to announce that Air France Industries KLM Engineering & Maintenance (AFI KLM E&M) selected Nyco Grease GN 148, its latest multipurpose synthetic grease, for use on the Air France fleet of Boeing and Airbus aircraft, including Boeing 747, 777 and Airbus A380, A340, A330, A320 family.

*"NYCO has been providing AFI KLM E&M with technical expertise in lubricants via a long-standing partnership. We are pleased to have worked together to broaden the spectrum of applications of this grease and consequently helped Air France to rationalize its grease consumption."* said Guillaume Forestier, Director of NYCO Aeronautics division.

Air France is the first operator to generalize the use of Nyco Grease GN 148 as multipurpose grease on a mixed fleet; thus rationalizing the number of lubricants used on its large fleet and simplifying maintenance tasks.

Approved against demanding specifications including BMS 3-33 B, AIMS 09-06-002, MIL-PRF-23827 C, SAE AMS 3052, Nyco Grease GN 148 can be used on all commercial airframes in 90% of aircraft maintenance tasks requiring lubrication: actuators, doors, flaps, slaps, ball, roller or needle bearings, gears, Tail Horizontal Stabilizer (THS) among others.
